730 Chain Trailer

- ❖ Triple Chain Feed
- ❖ Low Maintenance
- ❖ Spinner Speed Readout
- ❖ High Torque motors
- ❖ Three Speed Gearbox
- ❖ Stainless construction
- ❖ 5m³ to 18 m³ Capacity
- ❖ 730 mm Wide Chain
- ❖ Easy Loading
- ❖ Ground Speed Related Feed
- ❖ Light rates of urea
- ❖ Heavy rates of Lime or Manure

For large volumes of waste, wet or dry lime and light rates of urea, the **Transpread 730 PROspread** will spread most materials. A 730 mm wide door opening gives unobstructed feed on to the high powered 675 mm spinners. High floatation tyres keep you on top in the wet and prevent you ploughing the corners of the fields.

The **Transpread PROspreader** comes fitted with under floor return system giving it the ability to spread almost any product.

Chain Feed Quality

- The excellent **Transpread** designed chain provides reliable and constant feed to the spinner discs.
- Easily spreads all types of materials from lime to slag to fowl manure
- Chain conveyor gives reliable, effective and accurate spreading on hilly or uneven ground.

Superb Accuracy

- Uniquely shaped spinner discs work together to provide an accurate, controlled, even spread regardless of materials!
- A **Transpread** digital tachometer comes standard with all **Transpread PRO** spreaders. This

enables the operator to accurately monitor the spinner speed

Speed Related Ground Drive.

- No more guess work with rates and speed, simply set rate to chart and drive any speed you like. Feed is ground related from trailer wheel through a three speed gear box.

Proven History and Performance.

- Around the world, for over 45 years of development and use in some of the most punishing conditions across the world. **Transpread** spreaders continue to sell better due to the expert design and experience. Patented technology means you can't get better accuracy, reliability and quality from any other spreader.

Optional Attachments

- All have the option of being fitted with **Transpread ComputerSpread** controls for super accurate spreading and GPS guidance

MANURE SPREADING

TRANSPREAD for VERSATILITY

MULTI-ROW SPREADING

Used in crops such as sugar cane, cotton etc.

High clearance, twin chain drive system for ultimate control of spreader. Computer option available
