

TESTING

SPREAD TESTING

Transpread units are constantly tested both by external bodies and in-house experts in realistic farming conditions not laboratories. This ensures that the units continuously perform to the very highest quality and performance standards set by the company and demanded by you.

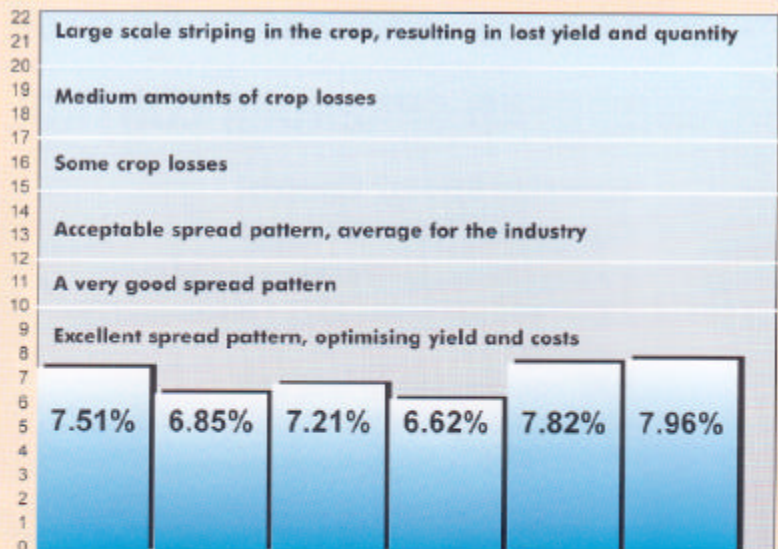

ACCURACY OF SPREAD PATTERN UTILISING A TRANSPREAD UNIT

All results given in these graphs have been achieved in the field.

Tests carried out indoors would normally show an improvement in CV.

Transpread sells a full range of testing equipment including - scales, collecting boxes, sight glasses, spreadtest programme, and sieve analysis boxes.
