500 WIDE CHAIN SPREADER

The Transpread Advantage

- All Stainless Body
- Maintenance Free
- Three Speed Gearbox
- Light Weight
- 800kg 3 Point Linkage to
- 5500kg Trailed Models
- Stainless Steel or Painted
- Field Proven
- Tachometer

900kg Stainless 3 point linkage on detachable chassis with cover

Building in stainless produces a lighter unit helping you stay on top in wet conditions. Stronger longer lasting, reduced maintenance unit. More corrosion resistant unit giving a longer life and enhanced product flow inside bin, decreasing the possibility of bridging even on wet or sticky materials. No need to worry about scratching the paint or having to touch up rust spots. No need to shed the unit in winter.

With the increase in High analysis fertilisers that are being spread and the higher corrosion that these materials have on machinery, a machine that can spread these at the light rates required and last the distance is important.

5.5 Tonne medium profile tandem axle above and 3 Tonne single axle with flotation tyres left

MODEL RANGE

- 3 Point Linkage 900 - 1500kg
- 2 Tonne Short 1500 long
- 3 Tonne Low 2400 long
- 4 Tonne Low 3000 long
- 4.5 Tonne medium 2400 long
- 5.5 Tonne medium 3000 long
