

830 WIDE BELT SPREADERS

The machine that can spread the widest range of rates and materials most accurately, on the market today.

These units have no exposed chains or belts, no jockey wheel and are controlled by the ComputerSpread system. a monthly service cycle, no having to get a grease gun out once or twice a day. Making a Transpread unit virtually maintenance free.

Complete unit driven from truck engine via PTO. (no auxiliary motor)

Patented Transpread Semi-Enclosed EvenSpread Deflector System.

Monocoque construction eliminates hidden rust spots. Full length mudguards for a stream lined pleasing unit, something you will be proud to take on your customers farms. Painted steel or full stainless steel construction of unit.

Transpread ComputerSpread In-Cab Control, Variable Rate Control & GPS Ready.

Low profile, low centre of gravity.

What other belt spreader can you see into the bin from the drivers seat.

30% Stainless Steel componentry standard or complete bin stainless steel

Use as a drop on bin and have your prime mover free for other work when not spreading. Will spread lime, gypsum, foul manure, urea, superphosphate, etc.
